

# ENDURO

Wristbands for access controls & identification

# CUSTOMISABLE CONTROL WRISTBANDS

Wristbands for access control and identification are strips of material worn around the wrist to help identify guests at events, concerts, water parks, etc. Additionally, they are used to control food and beverage redemption or VIP area access.

But they can also be customised to serve as a promotional tool. By adding your own design with personalised data or your logo, you easily increase brand awareness.

### Advantages of ENDURO wristbands for identification:

- > Compared to synthetic papers on PE (Tyvek) or PP basis: easy to print like paper with standard laser printers
- > Compared to polyester-based plastic: soft and without sharp edges due to the paper-film base and therefore more comfortable to wear
- > Compared to paper: wearing comfort is comparable to paper tapes including increased tear-resistance and durability for several days outdoors due to film core between paper layers

### Product properties:

- > Soft, durable, comfortable paper wristband without sharp edges
- > Tear-resistant & dirt-repellent: optimal for outdoor use
- > On demand printing with all colour laser printers allows endless designs and personalisation
- > Combines the advantages of paper printing with the durability of Tyvek and plastic materials
- > 6912 is waterproof (also e.g. in the swimming pool) for several days
- > 6900 can be disposed of via paper recycling

Product	Weight g/m <sup>2</sup>	Thickness µm	Printing technology	Stiffness	Product stability	Water resistance	Paper recycling	FSC® certified
